

Silicon Mountains Summit & Expo 2026

Event Overview

Launched in 2019 by UEICT, the **Silicon Mountains Tech Summit** has established itself as Armenia's premier high-tech event. To date, the summit has hosted over 100 world-class speakers and welcomed more than 10,000 attendees, effectively connecting Armenia's rapidly growing tech ecosystem with global leaders, innovators, and decision-makers. The event forms a very productive public private dialog platform, among participant and speakers was PM of RA, government representatives.

To meet increasing demand and drive nationwide digital transformation, the summit expanded in 2024 to a biannual format, hosting events in both the capital city of Yerevan and key regional hubs.

Following the success of our June 2026 special edition—RISE Powered by Silicon Mountains Expo & Forum, which focused on innovation, engineering, defense, and education—we are scaling our impact even further this fall.

What to Expect: Silicon Mountains (November 3-4, 2026)

This November, Silicon Mountains returns in an upgraded two-day format, bringing together a comprehensive **EXPO** and **SUMMIT** under the overarching theme **"INVEST IN INNOVATION"**.

Our previous keynote speakers have included globally recognized technology leaders and laureates of the Global High-Tech Award of the Republic of Armenia, including:

- Mr. Shantanu Narayen, Chairman and CEO, Adobe
- Mr. N.R. Narayana Murthy, Founder, Infosys
- Dr. Chi-Foon Chan, Former Co-CEO, Synopsys
- Mr. Vincent Roche, Chair and CEO, Analog Devices
- Noubar Afeyan, Founder & CEO, Flagship Pioneering
- Hovhannes Avoyan, Founder of PicsArt

The Expo

Over two dynamic days, the prestigious **Dvin Music Hall** will be transformed into a modern technology and innovation Expo Center.

The Expo will provide a platform for companies and startups to showcase cutting-edge technologies, present innovative solutions, connect with potential partners and investors, and build strategic B2B relationships. Participants can expect two days of exhibitions, presentations, workshops, networking opportunities, and dedicated investment-focused sessions for startups.

The Summit

Taking place at the **One&Only Theatre**, the Summit will bring together world-renowned speakers, technology executives, investors, policymakers, and industry pioneers to discuss investment strategies, emerging technologies, innovation-driven growth, and cross-border technology cooperation. The Summit is expected to bring together **500+ participants** for high-level discussions and networking.

Microelectronics Olympiad Final

Following the Summit on November 3, the final of the **International Microelectronics Olympiad** will take place, bringing together top-performing participants from **more than 13 countries** and highlighting the next generation of microelectronics talent.

International Microelectronics Forum

On **November 4**, Silicon Mountains 2026 will host the **International Microelectronics Forum**, bringing together international and local experts, industry leaders, technology companies, and policymakers to explore the future of microelectronics and its strategic role in the global technology ecosystem. The Forum will focus on **semiconductors, chip design, R&D, investment, talent development, and international cooperation**, providing a platform for expert dialogue, knowledge exchange, and new business partnerships.

Networking & B2B Private Zone

A dedicated networking and B2B zone will provide international delegations, technology companies, venture capital funds, institutional investors, and local innovators with opportunities to establish direct business connections, explore investment opportunities, and develop strategic partnerships.

Press Zone

A dedicated press zone will provide media representatives with a professional space for interviews, expert commentary, and coverage of the event and its key participants.

Topic: Invest in Innovation

Format: 2-Day Expo, Summit, Workshops, Startup Investment Sessions, B2B Networking, Microelectronics Olympiad Final & International Microelectronics Forum

Location: Dvin Music Hall, One & Only Theatre, Yerevan, Armenia

Expo participants: 50+ companies

Summit participants: 500 +

About the Organizer: UEICT

UEICT (Union of Employers of Information and Communication Technologies) was founded in 2015 in Armenia by large ICT companies operating in Armenia. At present, UEICT has about 140 members comprising multinational companies, local ICT companies, banks, startups, regional companies, and ICT-oriented educational institutions, as well as the three largest telecommunications companies. UEICT is a prominent organization representing the interests of the information and communication technology (ICT) sector in the country. The strategy of the Union is focused on lobbying for education, the economy, proportional development, and positioning. UEICT has developed different projects in the fields of STEM education, business development, PPD and has raised the visibility of Armenia in the international market.
