ABOUT SILICON MOUNTAINS

Launched by UEICT in 2019, Silicon Mountains is Armenia's premier tech event. It brings together global tech leaders, startups, investors, and top government officials—including the Prime Minister—for productive public-private dialogue. To date, the summit has hosted over 100 world-class speakers and 10,000+ participants. Since 2024, it has grown into a twice-a-year event, expanding from Yerevan into Armenia's regional innovation hubs.

The Expo represents a unique opportunity for companies to showcase their solutions, strengthen their market presence, and engage with a targeted audience of technology professionals, decision-makers, investors, and potential partners.

Building on its successful debut, the RISE Expo & Forum brought together 40 exhibiting companies and 5,000+ visitors, creating a powerful platform to showcase Armenia's advancements in technology, engineering, defense innovation, and research.

ORGANIZER OF THE EXPO

The Union of Employers of Information and Communication Technologies (UEICT) was founded in 2015 by leading ICT companies in Armenia. Today, it brings together more than 140 member organizations, including multinational and local tech companies, banks, startups, educational institutions, and the country's major telecommunications operators.

UEICT is a leading voice for Armenia's ICT sector, working to advance education, support economic growth, strengthen public-private collaboration, and enhance the country's global positioning. The Union has launched impactful projects in STEM education, business development, and public-private dialogue (PPD)—all while actively raising Armenia's visibility on the international tech map.
