

ARMENIA ENGINEERING WEEK

2026

Dear Engineers and Friends of Engineering,

We are fast approaching Armenia Engineering Week (AEW 2026), October 2-4. a yearly global event focused on the High-Tech sector.

This year, Armenia Engineering Week (AEW 2026) will spotlight the transformative role of Artificial Intelligence in Engineering, focusing on the Semiconductor Test, Robotics, Automotive, RF & Communications, Aerospace. Smart Manufacturing as well as the Education Technologies industries.

Please join us at this global conference, where these technologies come together. Under the theme 'Physical AI: Engineering Intelligence for the Real World', the event will examine how AI is integrated into machines, devices, factories, vehicles, infrastructure, and industrial systems. It will also highlight AI's importance to economic competitiveness, talent development, product innovation, and national technological capabilities.

This event will attract dignitaries, senior officials, business leaders, engineering professionals, engineering students, and organizations in the High-Tech sector,

We have an impressive line-up of speakers including Mr. Laith Altimime, President of Semi-Europe and Mr. Shakeel Peera, VP & General Manager, Microchip Technology

Please grab a colleague or two and see you in Yerevan!

[Registration for Armenia Engineering Week 2026 is now open](#)
